

Nuclear Shelters

Version 1 – 07 April 2022

A vast range of steel prefabricated nuclear shelters are commercially available, particularly in the USA, shelters which offer both nuclear blast protection and depending on the type of air filtration installed, varying degrees of NBC protection.

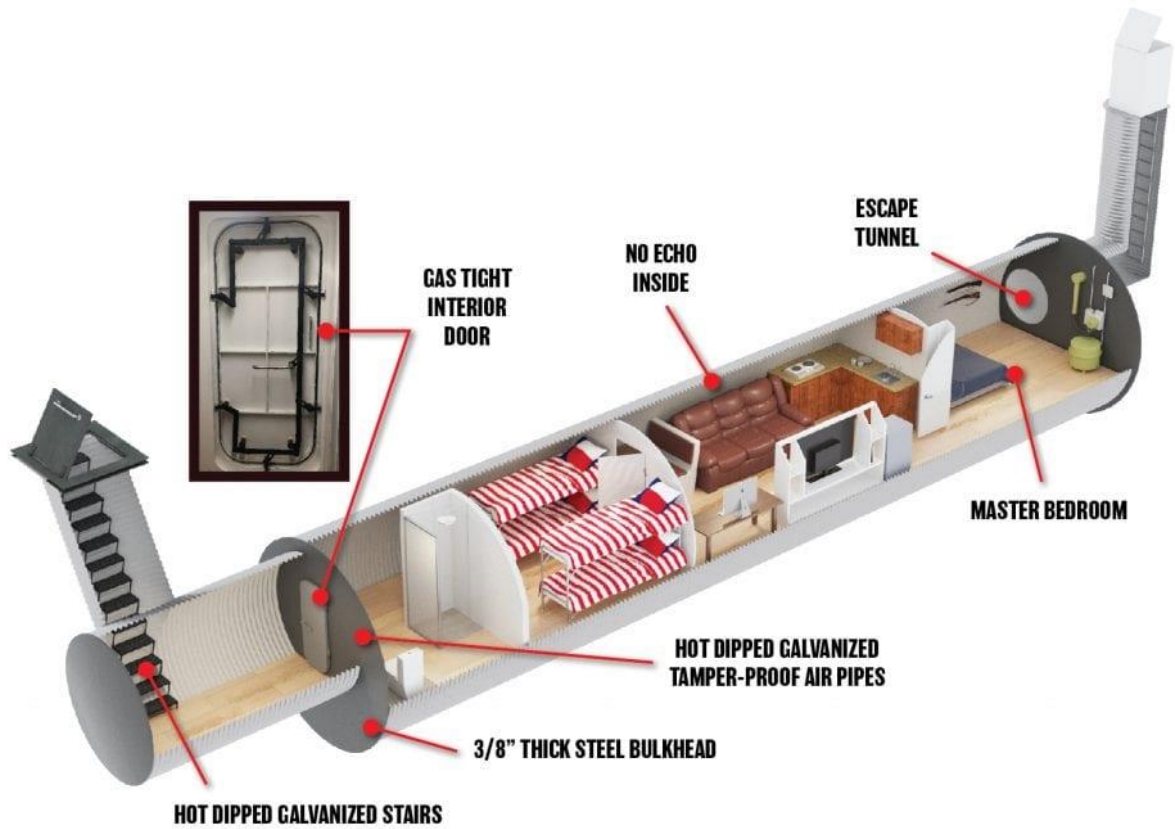

Some of these commercial offerings are illustrated below:

1. Atlas Survival Shelters

<https://www.atlassurvivalshelters.com/>

Atlas offers a fantastic range of steel constructed shelters, square steel constructions or in round culvert pipes. Units can be linked together to create very large shelters. All come with air filtration, water tanks, over pressure valves and hygiene facilities. They also offer small units which can be hidden under kitchens or garages. Made and supplied both in the USA and Europe.

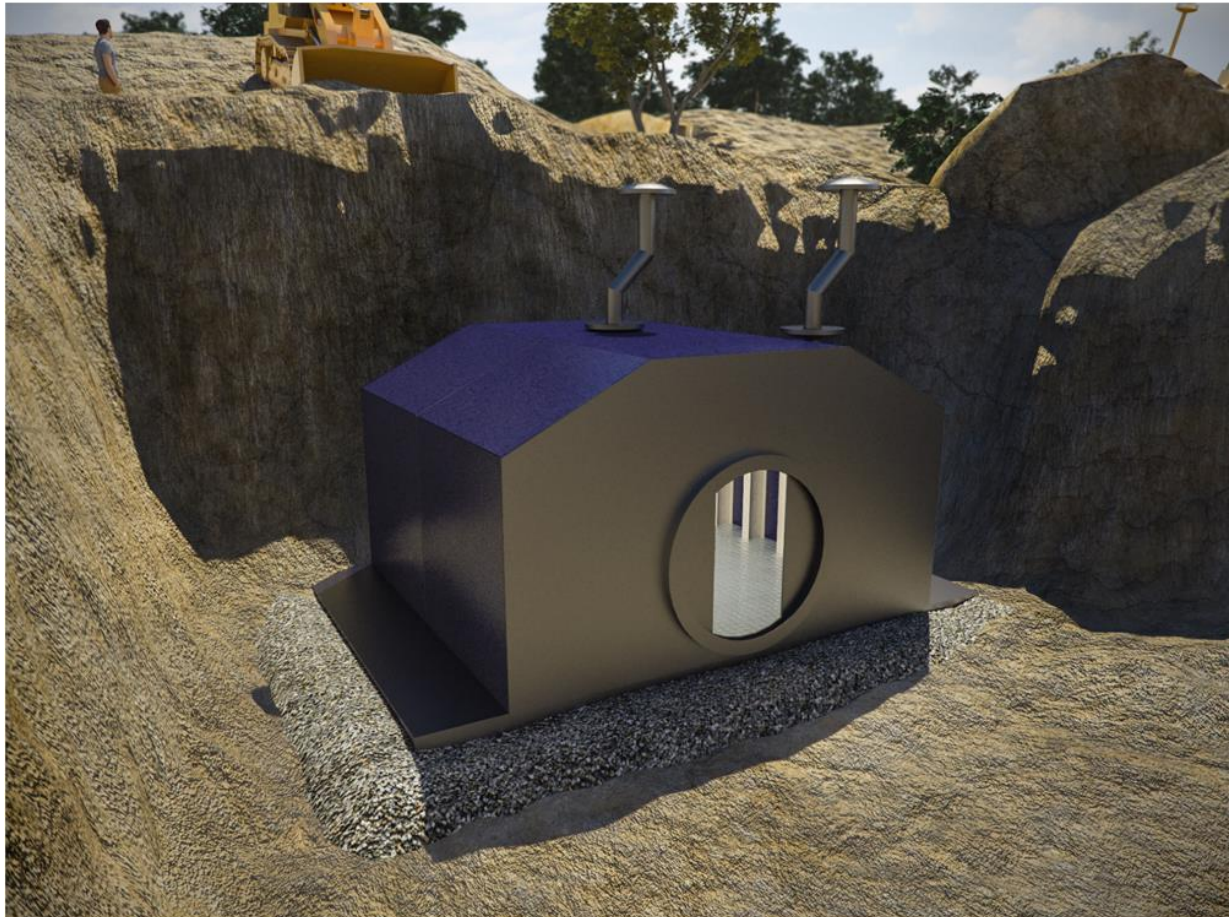

2. Norad Shelter Systems

<https://noradshelters.wordpress.com/author/noradshelters/>

Based in Texas, USA, Norad produces very high spec military grade nuclear shelters. Families seeking military-level underground shelter protection can now purchase the NORAD S16-16 bomb shelter which provides 8 people underground, off-grid protection for one year.

3. Rising S Bunkers

<https://risingsbunkers.com/>

Based in Texas, Rising S Bunkers promote themselves as the USA's biggest manufacturer and supplier of steel bunkers, bomb shelters, safe rooms (panic rooms), and blast doors. They have been in the underground shelter business for over 10 years and can offer units up to 6,000 square feet in size.

Furniture and Decorations are for demonstration purposes only

4. The Ultimate Bunker

<https://ultimatebunker.com/>

Ultimate Bunker, again based in the USA, supply personalized safe rooms, gun vaults and underground bunkers.

5. Terra Vivos

<http://www.terravivos.com/>

Vivos sells space in “community” type bunker complexes both in the USA, Europe and Asia (?).

Current Bunkers:

- **VivosXpoint**, located in the Black Hills area of South Dakota, is an 18 square miles area comprising of 575 ex-military steel and concrete ammunition storage bunkers that can accommodate up to 20 in each bunker. Bunkers can be occupied on a shared or individual basis.

- **Vivos Indiana**, built to survive a 20 Mt blast this is a large underground community bunker that can accommodate up to 80 people for 1 year.
- **Vivos Europa One**, located near Jena, Germany it is intended to be the world's largest "luxury" community shelter. Carved out of solid rock it was built by the Soviet Union during the Cold War but is now privately owned. The complex comprises approx. 5 kilometers of underground tunnels and is designed to be split into 34 apartments of roughly 2,500 square feet each (232 m²). On surface 5 star facilities will also be provided. It is promoted on the understanding that given any catastrophe it will allow high net worth selected families to survive autonomously underground for several years without any need to immerge back to the surface. Apartments cost Euro 2 million each (unfurnished, shell with utilities only).

- **Vivos Trine** (still only at concept stage?)
